

Calcium Plus

Designed for the Re-Vegetation Industry.

For ease of use and improved results.

Calcium Plus is a finely ground, high purity limestone with an added water-soluble calcium source providing immediately available calcium for the establishing vegetation, the included flocculant ensures this soluble form of calcium is penetrating the substrate it is applied to. **Calcium Plus** is low in dust, easy to spread and breaks down rapidly in moisture. **Calcium Plus** is designed with the revegetation industry in mind and applied via Hydromulching equipment for ease of application and accuracy of placement.

WHY USE CALCIUM PLUS.

1. Calcium Plus is much finer than standard aglime.
2. Enables accurate placement of product with minimal loss.
3. Designed to work with Hydromulching equipment - allows for more flexibility in application.
4. Can be applied with seed or fertiliser direct drilled or applied by air seeder.
5. Effective for spot treatment.
6. Good source of calcium, essential for plant growth
7. Provides 3 sources of calcium immediate from a water-soluble source, medium term and long term from milled Lime.
8. Easily disperses in water and includes a soil flocculant to assist with soil penetration of the soluble calcium source.

Calcium Plus Analysis:

Soil Type	Spray Application	Direct Drilled Air	Chemical Analysis	Element	Typical Value
Sand/Loamy Sand	150	50		CaCO ₃	93.1
Sandy/Silt Loam	250	75		MgCO	3.4
Clay/Loamy Clay	300	100			

Bulk Density	1.2
API Value	110
Neutralising Value	95
