ENVIROSTRAW HGM

Australian-made innovation that delivers productivity and results.

EnviroStraw's Hydraulic Growth Media (HGM) is an innovative hydro-seeding mulch made right here in Australia. Formulated from annually renewable natural fibres and including bio-stimulants and a bespoke suite of 22 different beneficial bacteria and fungi, it's designed to rebuild disturbed soils on construction sites.

Improved water-use efficiency (WUE) ensures better outcomes. The product requires less water to apply, which helps reduce costs and CO2 emissions on site. Using HGM allows up to 50% more mulch per tank-load, which means spraying 50% more area, less time filling tanks and more productive days overall.

EnviroStraw™
HGM

↔ Sold in 20 kg bales plus +/- 1 kg per bale, 52 bales per pallet.

Why you need EnviroStraw HGM

- ✓ Allows up to 50% more mulch per tank-load
- ✓ Weed and pathogen-free via extensive thermal processing
- ✓ Environmentally responsible for aquatic wildlife
- ✓ Leads to more productive days
- ✓ Requiring up to 50% less water than similar products during the application process
- ✓ Includes a diverse range of microbiology and biostimulants

ENVIROSTRAW HGM

APPLICATION GUIDELINES

1. Designed for slopes below 1V-3H
2. Suitable for all soil types (BioGrowth™ soil science recommended)
3. Can be used for commercial and residential development sites, highway and roading projects and mine sites.

Source fibre is produced from annually renewable straw fibre.
All fibre materials are **free** from plastics or other non-biodegradable substances.

APPLICATION CONSIDERATIONS

SLOPE GRADIENT	APPLICATION RATE IN KGS PER HECTARE
<1V-3H	2500 kg
>1V-4H to <1V-3H	3500 kgs

* Rates are a guide only on-site conditions should be considered to determine the appropriate application rate always consider rainfall wind velocity, slope angle soil type and seed bed preparation. Typically, slow wetting soil types clays or example and slopes with not the ideal seed bed preparation increased application rates are recommended.

- Fibre will easily disperse into a uniform slurry when mixed with water, and is of a natural straw colour that will not stain concrete or other surfaces.
- Fibre and other mulch ingredients are free from growth or germination-inhibiting ingredients.
- Mulch fibre should be applied in a slurry solution using hydromulching machinery.
- We recommend the use of HydroGrip Plus binder with this product.
